SEMINAR ANNOUNCEMENT

Designing new anti-helminthic vaccines based on their secreted extracellular vesicles

Javier Sotillo

Research Fellow, Australian Institute of Tropical Health and Medicine,
Cairns, Australia

Wednesday, 22 March 2017
11:45 - 12:30

Monterotondo, CNR Seminar Room

Highlights

Extracellular vesicles from helminths play important roles in host-parasite interactions. They can modulate the immune response, are implicated in pathogenicity and can even promote tumorigenesis; but can we target them to fight against these devastating diseases?

Host: Giovina Ruberti
